

VIOLENCE IN HEALTHCARE

WEDNESDAY NOV 8 | Interactive Live Webinar | 9 am - 12:30 pm

5x

healthcare violence injuries vs other workplaces

5.2k

nurses assaulted, April-June 2022

2.4k

bomb threats in 2022

35%

increase in bomb threats

Sources: U.S. Bureau of Labor Statistics, Press Ganey, U.S. Bomb Data Center

WHAT YOU'LL LEARN

With violence in healthcare on the rise, IHA's exercise will simulate a bomb threat after several workplace violence incidents so your team can assess organizational readiness and response. Our goal is to enhance safety for healthcare workers and patients by strengthening your preparedness plans and procedures.

BENEFITS FOR YOUR HOSPITAL

- ▶ **Assess** your staff's operational readiness, knowledge and understanding of emergency preparedness roles and responsibilities
- ▶ **Evaluate the effectiveness** of your emergency management plans and how those plans can be fine-tuned

EXPERT PRESENTERS

Stephen Weiler MS, MEP, CPP, CPD
Manager of Resiliency Services, Risk, Consulting and Training, HSS, Inc.

Keneatha Johnson, MPH
IHA Senior Director, Safety and Emergency Preparedness

DESIGNED FOR

- ▶ Clinical Nursing
