

10/15/2021

MEMORANDUM

TO: Hospital Administrators
Hospital Pharmacists
Infusion Sites
Hospital Emergency Response Coordinators
Regional Hospital Coordinating Centers

FROM: Theresa Tolar, BSN, MBA, RN
Hospital Preparedness Coordinator
Division of Preparedness and Readiness
Office of Preparedness and Response

RE: Cycle 05 Antibody Therapy Allocations to Healthcare Partners

Cycle 05 Antibody therapy were allocated the week of 10/11 to 10/17/2021 as below. It includes the addition of Sotrovimab as well as Regeneron's antibody cocktail casirivimab/imdevimab and the bamlanivimab/etesivimab products for the treatment of mild to moderate coronavirus disease. In Cycle 05 the State of Illinois was allocated 2020 patient courses of bamlanivimab/etesivimab and 1680 patient courses of Regeneron's casirivimab/imdevimab and 1110 patient courses of Sotrovimab.

State Allocation Process will consider the following metrics:

- **Prior utilization per teletracking reports**
- Case rate by county
- Available ICU beds in COVID Region (not all counties have ICU beds)
- Social Vulnerability Index by county (High vs. Low SVI)

Update regarding shipping delays:

- Many sites got "unexpected" shipments this week. AmerisourceBergen cleared a bunch of held orders due to credit or licensure issues this week and it released prior cycles orders. In doing so, some holds released twice from prior "retries".
- **Please consider using bamlanivimab/etesivimab IV in place of regencov IV for infusions.**
- **IV Regeneron formulations may also be used for Subcutaneous dosing- please see attached.**

Any vials not accepted by healthcare partners will be re-allocated to other healthcare providers based on urgent requests to IDPH. *Note: A request does not guarantee the amount of*

Mab requested will be provided or that the request will be approved. Priority will be based on areas of the state with the greatest need.
